**DETAILED ACTION*****Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-16 of U.S. Patent No. 7,080,646. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patented claims define a portable ventilator that anticipates the now claimed subject matter. Examiner takes Official Notice that anticipation falls well within the scope and definition of Obviousness. Therefore to have claims drawn to the now claimed subject matter would have been obvious to one of ordinary skill in the art at the time the invention was made in view of Examiner's Noticed fact. See also *In re Goodman* cited above for further support of Examiner's position.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by DeVries' 133 et al.

The DeVries et al. reference discloses a portable ventilator comprising a pneumatic subsystem 30, a power subsystem (i.e. battery), a sensor subsystem (see col. 8, lines 32-38), a logic board (i.e. an implied part of controller 12) and a recessed control panel (see Figure 3).

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Bird, Sato et al., Devries et al., and Derechanin et al. references pertain to ventilator systems cited in the related parent application.

Claims 2-12 are allowed.
